Generac® Hosts National Industrial Dealer Conference; Awards Wolverine Power Systems Top Honor

Waukesha, Wis. – February 26, 2009 –Generac® Power Systems, Inc., Waukesha, Wis., a leading manufacturer of standby and portable power generation equipment, hosted its 24th annual Industrial Sales & Service Dealer Conference, January 25 – 27 in Milwaukee, Wis. The national conference was an opportunity to thank Generac dealers for their support in 2008 and discuss new initiatives for 2009. Although 2009 does look to be one of confined economic expansions, the Generac Industrial channel has a history of excelling in tough economic environments.

As part of the conference, Generac conducted an awards ceremony to acknowledge top dealers for best practices in 2008. Wolverine Power Systems, Zeeland, Mich., (www.wolverinepower.com) the Industrial dealer for Generac in Michigan, earned top honors for an increase in overall sales and market share, increase in service/parts business and dedication to the support of Generac programs. Called the “Eagle Award”, this is the second time Wolverine Power Systems has secured this honor.

“We were pleasantly surprised to be acknowledged and awarded such an exceptional honor,” says Glenn Emmert, president, Wolverine Power Systems. “Generac plays a huge role in supporting our efforts in the Michigan area and we wouldn’t be where we are today without them.”

Additionally, Guy LeMonnier, sales engineer, Wolverine Power Systems, was recognized as the top seller of the year. LeMonnier took home a \$7,500 check for his extraordinary efforts in 2008.

(more)

With three full-service locations in Zeeland, Wixom and Gaylord, Mich., Wolverine Power Systems is adding new personnel and growing its branches. “During a time when companies are cutting their workforces, especially in Michigan, Wolverine Power Systems is looking to expand and hire new employees to keep up with the growing demand for back-up power,” continued Emmert. “We are proud of our continued success as a Generac Dealer.”

In the world of standby power, Generac continues to lead the way with an array of portable and standby generators that provide power generation solutions for any scenario. Generac generators operate on a variety of fuels including natural gas, diesel, Bi-Fuel™, liquid propane vapor (LPV) and gasoline. The company also manufactures its own line of four-cycle, air-cooled OHVI® (Overhead Valve Industrial) engines designed to run on gaseous fuel. As Generac’s sole focus is engineering and manufacturing quality generators, the company is at the forefront in offering superior solutions for demanding power applications.
