Long-Standing Generac® Industrial Power Dealer Elected 2011 President of EGSA

Waukesha, Wis., – February 24, 2011 – [Generac Industrial Power](#) dealer John Kelly, Jr., founder and president of [Kelly Generator & Equipment, Inc.](#), was elected president of the [Electrical Generating Systems Association](#) (EGSA) for 2011. He assumed office on January 1.

EGSA is the world's largest organization dedicated exclusively to on-site power generation. The Association is comprised of 800 companies around the world that make, sell, distribute and use on-site power generation technology and equipment.

"EGSA is a terrific trade organization for manufacturers and dealers in the power generation industry," said Kelly. "It's a place to exchange ideas, build relationships and work for best practices. I'm excited to be leading EGSA this year, and honored to have been chosen by my peers."

The president of EGSA is elected by the board of directors. In his new role, Kelly will preside over meetings of the full board as well as the executive board, and oversee the two annual EGSA conventions. Prior to being elected president, Kelly served a four-year term as an EGSA director, followed by three years on the executive board.

"Kelly Generator has been a Generac dealer since 1992," said Paul Bowers, vice president of sales, Generac. "We know that John will bring the same knowledge and dedication to his leadership of EGSA that he has demonstrated in growing his business and mentoring other dealers. We congratulate him on his achievement and look forward to working with him as a member of EGSA."

About Generac (NYSE: GNRC)

Since 1959, Generac has been a leading manufacturer of backup power generation products serving industrial, light commercial, and residential markets. Generac power systems range in output from 800 watts to 9 megawatts, include a complete line of automatic transfer switches, and are available through a broad network of independent and industrial dealers, retailers and wholesalers. For industrial applications, Generac offers diesel- and gaseous-fueled generators; the Bi-Fuel™ system for dramatic cost savings; the Generac Modular Power System (MPS) for exceptional reliability and scalability; and the Gemini Twin Pack system for serious space-saving requirements. For more information on Generac and its extensive line of generators, visit www.GENERAC.com.

About Kelly Generator:

Kelly Generator & Equipment, Inc. (KGE) was established in 1992, and is the Mid-Atlantic distributor for Generac Power Systems. KGE is a coordinated rapid response organization known for the quality of its service and the reliability of the generators it sells, services and rents. The company is distinguished from its competition because of its primary focus on power generation, making KGE uniquely qualified to install, service, and offer training for mission critical, industrial, commercial and residential power generation solutions. The company offers gas and diesel standby power solutions ranging from 7 kilowatts to 9 megawatts, specializing in modular power and Bi-Fuel™ generators. KGE also rents diesel generators as small as 20 kilowatts with paralleling capabilities as large as 3.5 megawatts, and load banks of all sizes—resistive and reactive.
