## Gen-Tech Expands Presence in Tucson, Arizona

**Waukesha, Wis. – September 8, 2009** – Gen-Tech, Glendale, Ariz., industrial dealer of Generac® Power Systems 9 MW generator systems and below, is pleased to announce it has expanded its services to include Tucson, Ariz.

“Ensuring cost-effective coverage of Tucson and its surrounding areas has been a challenge,” says Robert Piske, president, Gen-Tech. “In the past few years our business has grown in the Southern part of Arizona with significant captures in service agreements, and numerous modular power system sales in Tucson, Ft. Huachuca and as far out as Yuma. To provide effective service for our growing base of customers, we had to increase our presence.”

Gen-Tech’s first step towards expansion into the area was to better understand the needs of the customers in Southern Arizona and how to provide them with unparalleled customer service. It was for this reason they hired their first resident technician in Tucson back in February 2009 in anticipation of the July 1<sup>st</sup> opening.

The next challenge was to locate a facility that would be able to sustain the growing demand for both generator sales and rentals. “From a rental aspect, it’s important for your product to be readily accessible,” says Jerry Gibson, sales operations manager, Gen-Tech. “As a 24-hour, seven day-a-week service provider, this expansion allows us to respond in minutes rather than hours, and to stage our rental generators in a location where we can more effectively respond to the immediate surrounding areas as well as bid on larger, local projects including those involving border security-related businesses.”

Gen-Tech’s Tucson location is located one mile from I-10 and sits on a 12,191-square-foot lot with an office building that is 3,851 square feet and includes an open warehouse with a 16-foot ceiling.

**About Generac Power Systems, Inc.**

For nearly 50 years, Generac Power Systems, Inc. has been a leading manufacturer and marketer of innovative industrial, commercial and residential standby generators. For industrial requirements, Generac offers the Generac modular power system (MPS) for exceptional reliability and scalability; the Bi-Fuel system for dramatic fuel cost savings; and the Gemini Twin Pack system for serious space-saving requirements. For more information on Generac and its extensive line of both portable and automatic generators, visit [www.GENERAC.com](http://www.GENERAC.com).

**Accomplishments**

The Generac® Guardian series 20 kW Air-Cooled Standby Generator was named one of Professional Builder's 2008 "100 Best New Products"; was a finalist for the Building Products' "2008 MVP Awards" and Electrical Contracting Products' "2008 Innovation Award." In addition to the GenReady Load Center Panel, the 20 kW Air-Cooled Standby Generator received Professional Remodeler's 2008 "50 Most Innovative Products Award." In 2007, Building Products named the Generac® 16 kW QuietSource commercial generator one of its "2007 Top Products." Generac also received Building Operating Management's "2007 Reader's Choice Award" for the QT Series of commercial generators. The Generac Gemini® Twin Pack was a finalist for Consulting-Specifying Engineer's "2008 Product of the Year" award. Since 2006, Generac has been a Better Business Bureau Accredited business with an A+ Business rating.
