## **Generac® QuietSource® Series Offers Full Power Protection for Residential and Commercial Applications**

**Waukesha, Wis. – January 19, 2010** – The loss of power during severe weather conditions can cause substantial problems for residences and businesses. [Generac Power Systems, Inc.](#), Waukesha, Wis., understands the potential loss that affects residences and businesses during power outages. To help prevent such losses, Generac® has introduced the new Generac QuietSource® series, a premium line of automatic standby power generators, created for home and business owners who demand premium performance. All Generac QuietSource standby generators feature aluminum all-weather enclosures, and specially designed engines that run quieter at lower engine speeds.

“Power outages can cause long term damages to household appliances and business equipment,” says Clement Feng, executive vice president and chief marketing officer, Generac Power Systems, Inc., Waukesha, Wis. “By installing a Generac QuietSource generator, residences and businesses will make a solid investment in protecting their valuables.”

The QuietSource series generators range from 22 kilowatt (kW) to 60kW and are engineered to operate at low speeds, resulting in a much reduced sound output and longer life. While operating on clean-burning fuel with a choice of liquid propane (LP) or natural gas, this series has fewer exhaust emissions and no diesel odor. Generac QuietSource generators can be installed with a choice of several different switches, including automatic load-shedding switches, for flexibility in meeting virtually any local code requirements.’

The Generac QuietSource series meets the emissions requirements set by the [Environmental Protection Agency](#) (EPA) and the [California Air Resources Board](#) (CARB). This series, in addition to all Generac generators, is [Underwriters Laboratory](#) (UL) listed for safety and

certified power ratings. And Generac's QuietSource generators have earned the *Good Housekeeping Seal* after evaluation by the *Good Housekeeping Research Institute*.

Generac introduced the first gaseous-fueled automatic home standby system in 1989 and has been the leading brand ever since. Generac is a proud supporter of the [Home Safety Council](#) and has earned the [Good Housekeeping Seal](#) after evaluation by the *Good Housekeeping Research Institute*. For more information on Generac residential and commercial products, visit [www.Generac.com](http://www.Generac.com) or call 888-GENERAC.
