Zonatherm Products, Inc. to Host Generac's® *Experience the Power* Demo Trailer

Wheeling, Ill. – June 28, 2010 – Zonatherm Products, Inc., Wheeling, Ill., will host the new and improved *Experience the Power* Demo Trailer from [Generac Power Systems](#), a global manufacturer of portable, residential, commercial and industrial generators, Thursday, July 22 from 9:00 a.m. – 5:00 p.m. and on Friday, July 23 from 9:00 a.m. - 5:00 p.m. All persons in the area are invited to attend and tour the new truck. Additionally, Zonatherm will be offering Professional Development Seminars for electrical engineers, providing an efficient way to attend five sessions in a single day event while earning PDH credit. Registration is available at <http://www.zonatherm.com/generacseminar10.htm>.

Generac Industrial Power has recently redesigned and re-engineered its product line to better meet customer needs, with improvements including new engines and enclosures, several ergonomic enhancements and aesthetic changes. The new *Experience the Power* Demo Trailer has hit the road to educate the industry about Generac Industrial Power's new line of innovative power solutions.

"We thought it was important to bring the truck to our area and provide an opportunity for engineers to experience Generac's technology first-hand," says Bill Macaluso, vice president, Zonatherm Products, Inc. "We are excited to see the new truck and share Generac's new industrial products with our community."

The new Demo Trailer is a 53-foot tractor-trailer that profiles Generac's Modular Power System (MPS) technology, a flexible and expandable back up power solution for commercial and industrial applications that provides redundant power for critical loads.

The new and improved truck is large enough to hold

demonstrations and will showcase several new products, including two new diesel generators in order to fully demonstrate the MPS technology and a three-dimensional generator featuring the Bi-Fuel™ System, part of Generac's MPS technology that combines diesel fuel with natural gas in a compression ignition engine to provide redundancy and extended run time capabilities. The truck will also feature the Power Design Pro™ software, a complete generator sizing and system design tool supporting both electrical and mechanical design and GENlink software, both compatible with Generac Industrial Power products.

About Zonatherm

Zonatherm Products, Inc. has been in business for over 40 years serving the greater Chicagoland area including Northwest Indiana. Besides being a dealer for Generac, it is an exclusive representative for Emerson Network Power/Liebert, the largest suppliers of Uninterruptible Power Systems and Precision Air Conditioning for mission critical data centers. The company deals only with products supplied for critical applications and commercial HVAC and, to support this, has more than 30 professional field service technicians who are on call 24 hours a day, seven days a week. For more information on Zonatherm, visit www.zonatherm.com.

About Generac (NYSE: GNRC)

Since 1959, Generac has been a leading manufacturer of backup power generation products serving residential, light commercial and industrial markets. Generac power systems range in output from 800 watts to 9 megawatts and are available through a broad network of independent and industrial dealers, retailers and wholesalers. For industrial requirements, Generac offers the Generac Modular Power System (MPS) for exceptional reliability and scalability; the Bi-Fuel system for dramatic fuel cost savings; and the Gemini Twin Pack system for serious space-saving requirements. For more information on Generac and its extensive line of both portable and automatic generators, visit www.GENERAC.com.
