Generac's diesel gensets use an integrated design approach to combine all the components into an outstanding package that will provide years of reliable service. Generac takes great care in matching the right engine, alternator, control panel, enclosure, base tank and software to provide an effective, high value product at every kilowatt rating. We specialize in customizing our already versatile equipment to ensure that even uncommon requirements are satisfied efficiently and cost effectively.

MPS

For larger applications that require superior system reliability and redundancy, turn to Modular Power Systems.

Gemini®

Generac's Gemini Twin Pack features two 500 kW generators inside a single, weather resistant and sound attenuated enclosure.

Bi-Fuel™

Generac's Bi-Fuel generators start on diesel fuel and add natural gas as load is applied.
